Professor Richard Knowles (Salford University) and Dr Fiona Ferbrache (Keble College, Oxford University) invite abstracts for consideration for the following Transport Geography Research Group-sponsored session:

Transport, Sustainable Cities and Transit Oriented Development

Transport plays a key role in shaping space and has long been recognised as a 'maker and breaker' of cities (Clark 1958; Knowles 2006). Securing private and public sector investment in mass transit systems, green transport modes and smart city infrastructure can be problematic, but is central to developing sustainable cities (Cervero and Sullivan 2011).

Transit Oriented Development (TOD) is the process of focussing the development of housing, employment, activity sites and public services around existing or new rail or bus rapid transit stations or stops (Knowles 2012; Knowles and Ferbrache 2016). TOD is designed to create a relatively high density, compact and mixed urban form. TOD is now a very important part of a broader 'smart growth' approach to urban development and urban regeneration in many countries.

Keywords: Sustainable Cities; Transit Oriented Development; Rapid Transit; Green Transport Modes; Smart Cities

Please send abstracts of 250-300 words indicating title, author(s) and affiliation(s) by 6 February 2017 to r.d.knowles@salford.ac.uk and fiona.ferbrache@keble.ox.ac.uk
