The Conference traditionally looks at different themes concerning the quality of life in urban areas. The goal of this event is to gather researchers, road users, administrators, technicians, city representatives and experts aiming to discuss problems that affect the safety of pedestrians in the city, especially of children and persons with reduced mobility. The conference attracts practitioners and researchers who can find detailed presentations on policy issues, best practices and research findings across the broad spectrum of urban and transport planning. The conference covers international issues, national and local policies and the implementation of projects at the local level.

THEMES FOR 2019 Networks and Infrastructures to improve pedestrian mobility Urban space for non-motorized traffic and public transport Soft mobility and perception of urban landscape Walking, health and wellbeing Sustainable and resilient urban spaces Safety of urban environment Public space and Beauty Urban leisure environment Urban environment and Health Urban form and Heath Open spaces and green infrastructures Promoting healthy cities Healthy city for all The role of public space in attracting investments
