Healthcare, Mobilities and National Health Systems

Scientifique

-

Workshop

Date de début : 10 Janvier 2020 09:00**Date de fin** : 10 Janvier 2020 17:00**Lieu** : Lancaster | Royaume-Uni**Organisé par** : Lancaster University

Modern medicine is a practice regulated by state authorities, where healthcare is channelled through national systems designed to treat people who live primarily settled lives. Contemporary healthcare systems face a range of challenges, from the impact of austerity to continuing financial resource constraints, political tensions and the evolving nature of patient populations, which are becoming more diverse and less settled. In the context of such shifts across Europe, practitioners are increasingly caring for mobile populations, for example migrants, asylum seekers, refugees and homeless persons who (a) present with health problems associated with displacement and poverty; (b) lack regular legal status and/or permanent address, complicating access to care.

This workshop is the first in a series of three research and networking events funded by the Wellcome Trust within the framework of the Doctors within Borders project (Oct 1, 2019-Sept 30, 2020). The project's objectives are to (a) establish a sustainable network of collaborators that will explore the shifting responses of the medical community to the challenges posed by human mobility in healthcare and, (b) develop a new research agenda in health and mobilities research, including people-centred and mobile methods, to improve the comprehension of healthcare services from the perspective of migrant patients.

At this time, we seek contributions to the first workshop from members of the migrant community, members of advocacy groups, researchers (any career stage) and medical practitioners, to share your experiences and research in relation to the theme of Healthcare, Mobilities and National Health Systems. In particular, we are hoping to bring together two perspectives. Firstly, how do refugees, persons with an unsettled immigration status and persons without a fixed address access healthcare? What challenges do they experience? Secondly, how do practitioners go about delivering care to those groups? What challenges do they experience and what avenues exist for overcoming difficulties?

Informations pratiques :

How to apply?

If your experience and/or research speaks to these questions and you are interested in participating in the workshop, please email a brief Statement of Interest outlining:

Your personal/professional/research experience and how it connects to the theme of the workshop.
Your proposed contribution to the workshop. This can take the form of a traditional paper abstract, but it can also be a brief description of any relevant activities, programs or initiatives that you are involved in and would like to share.

Please email your Statement of Interest to k.follis@lancaster.ac.uk with the subject heading 'Doctors/Borders Workshop' by 6 November 2019. We will finalize the list of participants shortly thereafter and you will be informed of the outcome by the following week. There is no fee for the workshop and the organizers will cover travel and room and board for invited
